

# PASCO COUNTY WILDLIFE PROTECTION PROGRAM

*Parks and Public Space Planning, Landscape Architecture*

**Client:**

Pasco County

**Location:**

Pasco County, Florida

**Project Data:**

Glatting Jackson was contracted to develop the Wildlife Habitat Protection Program for Pasco County, including the development and approval of an ordinance approved by the Board of County Commissioners

Glatting Jackson was contracted to develop a Wildlife Habitat Protection Program for Pasco County. Our scope included the development of an extensive GIS database using information from the Florida Fish and Wildlife Conservation Commission, the Southwest Florida Water Management District, and Pasco County's existing, extensive GIS database of natural resource information. We analyzed existing linkages, wildlife corridors, locations of threatened and endangered species, existing public lands, and existing wildlife habitat exposed to development. Our work involved close association with a Technical Advisory Committee and a Citizens Advisory Committee to ensure input from a diverse array of citizens. Our technical report included recommendations for implementing the program. This technical report was accepted by the Board of County Commissions in March 2002. We are continuing to work with Pasco County to implement the program.
